

Marten Transport

Tune® delivered a jaw-dropping 11% savings in kilowatt-hours at Marten Transport's office and truck terminal in Mondovi, Wisconsin.

With the ever-increasing transportation and trucking costs, finding savings anywhere possible is critical for a company like Marten Transport.

11%
KWh SAVINGS

One Tune® device was installed in each of the six breaker boxes found in Marten's 30,000 square foot trucking terminal. The terminal is home to offices, trucker lounges, service garages, and Marten's transportation equipment storage. In the first 12 months after installation, an 11% savings in KWh was recorded.
