

City of Rainsville, AL

Upon taking office, mayor Rodger Lingerfelt sought ways to deliver savings to the citizens of Rainsville, AL. In September of 2017, he initiated an LED lighting retrofit and Tune® filter installations in many of the city's facilities. The performance was closely monitored with impressive results delivered in March of 2018. Rainsville continues to install Tune® filters across their facilities — testing next generation Tune® filters as they become available.

“We are not only saving money,

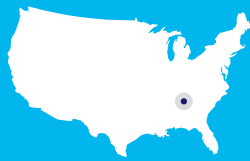

we are already seeing savings in maintenance... I don't get 5 calls a day about the issues at the new pumping station since we installed the filters.”

Rodger Lingerfelt,
Mayor of Rainsville

DESCRIPTION

Municipality consists of multiple structures of variable uses.

LOCATION / REGION

EQUIPMENT / SOLUTIONS

Tune® filters and LED retrofit across multiple municipal structures
